

SPECIAL INVITATION

TO AN INTRODUCTORY NUTRITION RESPONSE TESTING[®] SEMINAR

ABOUT JEANNE BARRY, BSN, DC

Dr. Barry graduated with her BSN from University of Rhode Island in 1987. She continued her education and earned her Doctor of Chiropractic degree from New York Chiropractic College in 1996.

She first came across Nutrition Response Testing at a seminar in Boston in 2007. She enrolled in the Nutrition Response Testing Advanced Clinical Training program UNS. As a Nutrition Response Testing graduate, she has helped many people overcome common health complaints such as anxiety, fatigue, irritability, mood swings, digestive issues, difficulty with weight loss, irritable bowel, allergies, ADD, ADHD and many other health related conditions. She strongly believes that we are at a place in history where the repair of health, including reaching optimal health, cannot be achieved without addressing and fixing nutritional deficiencies.

"I don't remember people being so sick when I started my career nearly 30 years ago. I grew up wanting to help people get well, so I became a Nurse. Feeling as it wasn't enough, I became a Chiropractor. I was able to help people even more but I still continued my search. When I found Nutrition Response Testing, I knew I would now be able to fulfill my purpose."

ABOUT NUTRITION RESPONSE TESTING

Nutrition Response Testing, developed by Dr. Freddie Ulan, is a non-invasive system of analyzing the body through the autonomic nervous system to determine the underlying causes of ill health. When these are corrected through safe, natural, nutritional means, the body can repair itself in order to attain and maintain more optimum health.

BENEFITS

- Easy to learn and apply in your current practice.
- Achieve better results with fewer products.
- Identify the five key resistance factors that can help you solve the toughest cases.
- Prioritize treatment, increase patient compliance and gain reproducible results
- Enjoy a stress-free, cash component in your practice, without insurance or managed-care hassles.
